## SKILLS

[Path = fonts/lato/]Lato-Bol  
LANGUAGES / RUN-TIME

- **Java**
- **TypeScript**
- **HTML**
- **CSS**

[Path = fonts/lato/]Lato-Bol  
FRAMEWORKS / LIBRARIES

- **SpringBoot**
- **Microservices**
- **Angular**
- **ngRx**
- **Bootstrap**

[Path = fonts/lato/]Lato-Bol  
DESIGN PATTERNS

- **Microservices**
- **MVC Pattern**
- **Dependency Injection**
- **Monolith**

[Path = fonts/lato/]Lato-Bol  
TOOLS AND SERVICES

- **Git**
- **Figma**
- **Postman**
- **AWS EC2**
- **Docker**

[Path = fonts/lato/]Lato-Bol  
NETWORK PROTOCOLS / API

- **HTTP**
- **REST**

## PROJECTS

[Path = fonts/lato/]Lato-Bol  
KARMA [PATH = FONTS/RALEWAY/]RALEWAY-MEDIUM— ECOMMERCE PROJECT  
*Github Link : [github.com/edwinlinson/ecom](https://github.com/edwinlinson/ecom)*

- Created a fully functional E-commerce web application using: **Java Spring Boot, Thymeleaf, JavaScript, HTML, PostgreSQL** and hosted the website using **Amazon AWS**.
- Integrated **Razor Pay** payment gateway for secure online transactions.
- Implemented OTP Verification using **Twilio** for enhanced security.
- Managed product listing, cart, and checkout processes on the user side.
- Developed sales reports and custom chart/graph reports on the admin side.
- Admin-side features include managing products, users, categories, and coupon offers.

[Path = fonts/lato/]Lato-Bol  
EMPLOYEE MANAGEMENT [PATH = FONTS/RALEWAY/]RALEWAY-MEDIUM— USING ANGULAR AND SPRING AND JWT

*Github Link*

- Developed a robust employee management web application using **Angular** with **NgRx** for efficient global state management, ensuring seamless user experience and data synchronization.
- Implemented JWT authentication to secure user interactions and control access to application features.
- Utilized **PostgreSQL** database for seamless data storage and management.
- Implemented user registration, login, profile management, and admin functionalities for data search, creation, deletion, and editing.

## MINI - PROJECTS

[Path = fonts/lato/]Lato-Bol  
JOB APP MICROSERVICE [BACKEND ONLY]

*GitHub Repository*

- Developed a Java Spring Boot-based microservices ecosystem including Company, Job, and Review microservices, integrated via Spring Cloud Gateway for unified entry point and authentication.
- Implemented asynchronous communication using RabbitMQ and synchronous communication via OpenFeign for optimized performance and scalability, supported by Zipkin for distributed tracing.

[Path = fonts/lato/]Lato-Bol  
NETFLIX CLONE

*GitHub Repository*

- Created a Netflix-style app in Angular, incorporating TMDB API for movie data, offering familiar browsing.
- Employed Angular's HttpClient module for streamlined API requests, ensuring efficient data retrieval.
